

BACTERIOSTATIC SANITIZING SPRAY

When typical cleaners and sanitizing sprays dry, they are done! They stop working as soon as they dry on the surface. NutraSpear is not typical. Once NutraSpear dries, it **KEEPS ON WORKING**, dealing with bacteria by using an invisible persistent bacteriostatic barrier that inhibits the growth of bacteria. No matter if it is a countertop, changing table or door handle.

NutraSpear’s range of sprays and wipes are designed for every application. We have you covered.

Features & Benefits

- Powerful, nonabrasive barrier inhibits microbes from colonizing and reproducing
- Cleans and sanitizes in one spray

bac•te•ri•o•stat•ic
noun
 The prevention of further growth of bacteria

ITEM	DESCRIPTION	CASE QUANT.
